

"The affected water plants are Bayai, Stumbin, Seduku, Lingga, LDS, Engkilili, Melugu and Pantu, all of which are at critical levels following the hot and dry weather for the past one month," he said.

"If this continues, some 15,000 households in Sri Aman will be affected, he told Bernama.

Water rationing in several of the plants is being carried out as a precautionary measure, he added.

"Among the critical ones are the plants in Lingga, Stumbin, Seduku, Melugu and Engkilili," he said.

The air quality in Sri Aman, meanwhile, showed a slight improvement at 8am today to very unhealthy, from hazardous level yesterday.
