## Dengue threat from abandoned plots

I PASS by the former DBKL field in Jalan Tun Sambanthan regularly and observe that the field is abandoned with overgrown lalang and water-filled plastic containers which are ideal for breeding of mosquitoes.

This field is near a DBKL office. A few yards further up there is another abandoned

building which was a restaurant.

Why has no action been taken against the owners of the vacant plots?

The situation has been in existence for months.
