Witnesses in Adib's case to take lie detector test

KUALA LUMPUR: Police will use the lie detector test on seven witnesses in fireman Muhammad Adib Mohd Kassim's murder case.

Federal Criminal Investigation Department director Datuk Huzir Mohamed said his team had identified the witnesses believed to be at the location during the incident.

"Based on videos of the incident, we have identified seven witnesses.

"At the same time, we will identify individuals from the seven witnesses who will undergo the polygraph test.

"We will seek assistance from the Malaysian Anti-Corruption Com-

mission to use the machine to determine if the witnesses are telling the truth," he said at Bukit Aman here.

Huzir said 30 people had their statements taken during the inquest.

"Twenty-eight of them had their statements recorded before this, while two pathologists from Kuala Lumpur Hospital have had their statements taken at Bukit Aman today (yesterday).

"We will get statements from Universiti Teknologi Mara Me-

chanical Engineering Faculty senior lecturer Dr Amir Radzi Ab Ghani and Professor Dr Shahrom Abdul Wahid, a retired

pathologist from Universiti Kebangsaan Malaysia Medical Centre.

On Sept 27, following a 41-day inquest to determine the cause of Adib's death, coroner Rofiah Mohamad ruled that his death was not self-inflicted or

an accident, but a criminal act by two or more unidentified people. **Bernama**

Based on videos of the incident, we have identified seven witnesses.
