The centralised database system on ownership of affordable homes priced at RM300,000 and less is expected to be completed before the end of the year, Deputy Housing and Local Government Minister Raja Kamarul Bahrin Shah Raja Ahmad Shah said.

Raja (*above*) said the data will contain all information on home ownership to ensure that homes priced at below RM300,000 are enjoyed by the target groups.

“The comprehensive and accurate data will help the government ensure that these homes are owned by people who really need them, especially those in the low-income group.

“It will no longer be for individuals with political connections or family ties with certain parties,” he told reporters in Kuala Terengganu today.

Raja had earlier visited local master batik craftsman Mahmud @ Mustafa Teh, 76, at his home here today. Mahmud suffered a stroke 13 years ago and has been paralysed since 2017. The visit was part of the Ziarah Kasih programme organised by Terengganu Amanah.
